Frontend Web Developer || React || Node.js || Next.js || MongoDB ||
Firebase || Secure Auth (JWT) ||
Dhaka, Bangladesh

Summary

I am a Computer Science and Engineering department student and a passionate frontend Web Developer with a deep interest in the modern web stack. Recently, I completed an intensive 7-month web development program.

I enjoy solving complex problems, even spending 18 days debugging a single issue that strengthened my persistence and analytical thinking. Challenges motivate me to improve, not quit.

I am comfortable completing projects with HTML, CSS, JavaScript, React, Node.js, Next.js, MongoDB Atlas, Firebase, JWT, Netlify, Vercel, and GitHub.

This is just the starting and I am committed to improving every single day.

My technical skills:

Frontend: HTML, CSS, JavaScript, React.

Backend: Node.js, Next.js.

Database: MongoDB Atlas.

Security & Auth: Firebase & JWT

Tools: GitHub, Vercel, Netlify.

I am now seeking an internship or junior-level web developer opportunities where I can contribute to real projects, work within a professional team, and grow into a high-impact developer.
